ISE CUSTOM SOFTWARE SOLUTIONS

INNOVATIVE SOLUTIONS FOR YOUR UNIQUE BUSINESS DEMANDS

ISE provides a complete spectrum of custom software development services. We support you by applying a robust, repeatable development process enabling your product to be delivered on time and within budget.

BROAD EXPERIENCE

ISE’s professional engineering team has extensive software development experience with several of the top communications, education, telematics, transportation and health care providers in the United States. We’ve worked with Fortune 500 companies, OEMs, after-market suppliers and small businesses.

WE ENABLE YOU

When working with ISE, you leverage our maturity, flexibility and knowledge base to gain a competitive advantage. We work closely with you to understand your business goals and to capture your requirements, ensuring your satisfaction and a successful collaboration. We can take your project from idea through development into operation and maintenance. We are ready to partner with you, whether as an extension of your team or as an outsourced product developer.

FRESH THINKING FROM A TECHNOLOGY LEADER

At ISE, we understand the value of technology is in the benefits it yields to your business. We select from best-in-class tools and state-of-the-art technologies to engineer solutions that fit with your existing processes and budget. ISE software capabilities include:

- End-to-End Enterprise Systems
- Mobile and Embedded Solutions
- Multi-platform Applications
- Wireless Communication Solutions
- N-tier Applications with Thin and Thick Clients
- Web-based Applications and Services (SaaS)

ISE Custom Software Solutions

Professional Services with a Personal Focus

ISE specializes in transforming complex problems into real-world solutions tailored specifically to your needs.

“ISE led our end-to-end telematics software development and brought a wealth of experienced technical talent, best-in-class software development processes and rigorous project management to our organization.”

Anil Bansal
Director of Electrical Engineering
Navistar, Inc.

- **Business Strategy**

ISE works with you to understand your business needs and how your solution addresses the market. We then develop a technical roadmap that enables your success.

- **Program Management**

ISE Program Managers are experts in the science of planning and coordination which is crucial to reducing risks and securing the success of your project.

- **Systems Engineering**

ISE Systems Engineers work with you to establish the functional requirements for your project and develop a robust and extensible architecture.

- **Software Development**

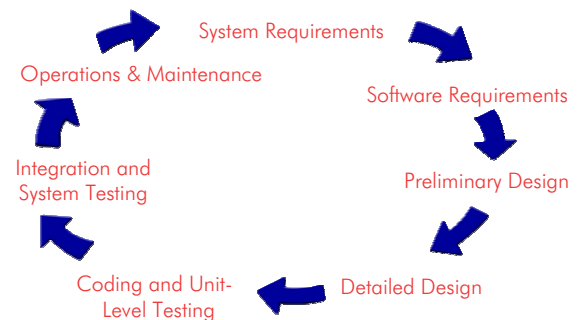

The ISE Software Development team brings extensive experience designing and developing enterprise-scale systems. We utilize advanced development tools and a disciplined process to facilitate a rapid development cycle.

- **Quality Assurance**

The ISE Quality Assurance team combines a detail-oriented approach with a variety of testing techniques to verify that the system implementation meets functional requirements as well as performance and scalability demands.

Reliable Results

Exceptional software requires much more than error-free code. ISE’s full life-cycle approach to software engineering involves a repeatable process that results in software of superior quality that is specifically designed to your specific requirements.
