

## Broad Expertise

ISE's professional engineering team has over 100 years combined software development experience with several of the top communications, education, transportation and health care services providers in the United States. We've worked with Fortune 500 companies, OEMs, after-market suppliers, and small businesses.

Our skill set and proficiencies span program management, development, validation, and documentation. Whatever the size of your project, the ISE team is ready to partner with you for a successful outcome.

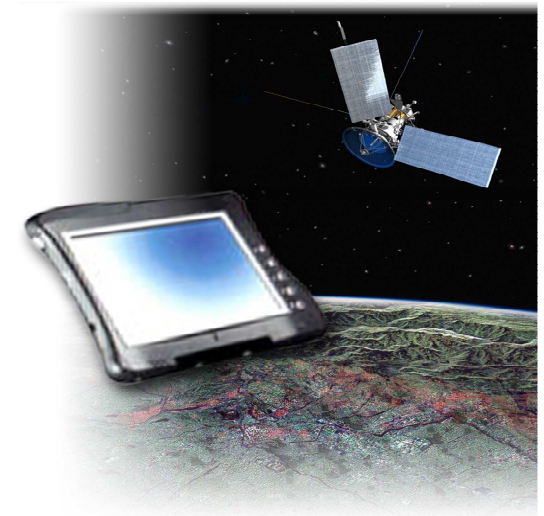

*“While we continue to be impressed with your process, it is the integrity and commitment of the people on your team who truly set you apart.”*

- Carolyn J. Brown, Ph.D.

**Your Custom Software  
Solutions Partner**

*Innovative solutions  
for your unique  
business demands.*

ISE provides a complete spectrum of **custom software development** services for any industry. We help you make the most of your investment by applying a repeatable development process, guaranteeing your product is delivered **on time** and **within budget**.

### Professional Services with a Personal Focus

ISE specializes in transforming complex problems into real-world solutions, tailored specifically to your needs. We provide:

- **Engineering Management**
  - Product Planning and Strategy
  - Project Management
- **Systems Engineering**
  - Requirements Capture
  - Architecture and Design
  - Systems Analysis
- **Software Development**
  - N-Tier Applications
  - Desktop, Embedded, and Wireless Solutions
  - Continuous Integration
- **Quality Assurance**
  - Test Planning and Execution
  - Automated Testing
  - Test Tool Development
  - Product Release Management

### We Enable You

As an ISE partner, you leverage our maturity, flexibility, and substantial knowledge base to gain a competitive advantage. We work closely with you to understand your business goals and to capture your requirements, ensuring your satisfaction and a successful collaboration.

We can take your project from idea through development into operation and maintenance. We are ready to partner with you, whether as an extension of your team, or as an outsourced product developer.

### Fresh Thinking From a Technology Leader

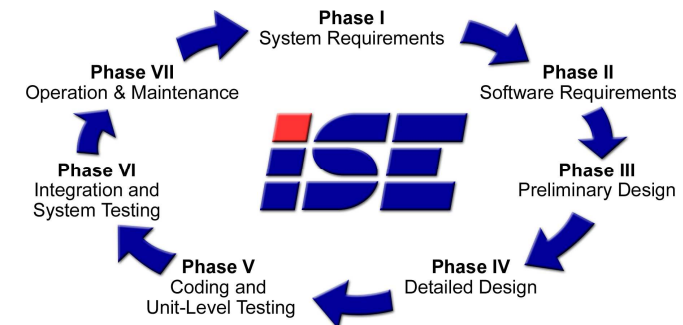

At ISE, we understand that the value of technology is in the benefits it yields to your business. We select from best-in-class tools and **emerging technologies** to engineer solutions that fit with your existing processes and budget. Our capabilities span:

- C/C++, C#, Java, J2EE, ASP.NET
- Windows, Macintosh, UNIX and Linux platforms
- Pocket PC and Palm OS
- Embedded and RTOS including VxWorks, QNX and Windows CE
- Wireless WAN and LAN such as 802.11b, ARDIS, Mobitex, Bluetooth, and OmniTRACS
- SQL Server, Primebase, DB2, MySQL and Oracle

### Proven Process, Reliable Results

Exceptional software requires much more than error-free code. ISE's **full life cycle approach** to software engineering involves a repeatable process that includes requirements management, project tracking and oversight, quality assurance, and configuration management.

Our adherence to this process means that you'll get software of **superior quality**, meticulously designed and rigorously tested to your special requirements. And ISE will continue to stand with you after your product is delivered. You can be confident that your software will work from the first day, and will continue to meet your customers' challenges well into the future.

Excellence through innovation. Commitment to quality. Exceptional service. These are what ISE brings to every project.

*Meeting your challenges,  
exceeding your  
expectations.*
