GPS Insight Announces New Electronic Logging Device (ELD) Solution for Best-In-Class Fleet Management

Scottsdale, AZ – GPS Insight, a top technology provider of [GPS vehicle and asset tracking solutions](#) for commercial and government fleets, announced today the release of the new GPS Insight Hours of Service solution enabling organizations with a paperless Federal Motor Carrier Safety Administration (FMCSA) compliant system.

[GPS Insight's Hours of Service \(HOS\) solution](#) leverages the field-proven strength of Innovative Software Engineering's (ISE) eFleetSuite application and the ELD-2000, a brand new GPS Insight-powered Android tablet, to deliver best-in-class GPS fleet tracking, real-time electronic driver logs, Driver Vehicle Inspection Reports (DVIR), and navigation for FMCSA compliance and superior fleet intelligence.

The secure, end-to-end solution features customizable pre and post trip DVIR to eliminate paperwork, reduces manual input errors, and ensures vehicles are repaired in a timely manner. Electronic Driver Logs automatically capture driver log information and comprehensive back-office reporting allows fleet personnel to make proactive decisions to avoid hours of service violations. It also provides navigation capabilities that improve routing efficiency. Automated electronic data collection offers a number of benefits to both drivers and fleet management departments:

Driver Benefits

Prevent use of fatigued drivers
Less stressful, streamlined roadside inspections
Reduction in paperwork

Fleet Management Benefits

Real-Time data improves logistics and dispatch
Prevent citations from paperwork errors
Insurance discounts

"ISE is very excited to expand its partnership with GPS Insight and deploy eFleetSuite on their new Android platform," said ISE President Hass Machlab. "Our teams closely collaborated to integrate our eFleetSuite application empowering GPS Insight customers with the necessary tools to improve driver safety and ensure compliance with FMCSA regulations."

"GPS Insight is thrilled to announce the release of our new HOS compliant solution. This next generation solution further enhances our long-standing relationship with industry leading HOS software provider ISE, says Elliot Batcheller, VP Operations at GPS Insight. "The enhanced solution will allow GPS Insight to leverage our expertise in GPS tracking while also providing an in-cab Android tablet that will feature robust DVIR, HOS, and truck routing applications."

GPS Insight's HOS solution complies with the current FMCSA 395.15 requirements and will be updated to comply with [Electronic Logging Device \(ELD\) mandate](#) requirements when they are announced.

About GPS Insight:

GPS Insight is a top technology provider of GPS fleet tracking software for businesses and government agencies with mobile assets. Using the GPS Insight Fleet & Asset Tracking Solution, companies realize a significant increase in efficiency and gain insight into all aspects of their fleet operations. Fleets work with GPS Insight to solve their unique fleet challenges through increased revenue, reduced costs, and reduced risk.
